WELCOME TO YOUR PERSONAL ASTROLOGICAL ALMANAC

The almanac is a tool designed to assist you in tracking the current celestial movements, their conversations with one another, and their interactions with your personal natal chart. It offers data that is relevant for astrological interpretation, however it generally does not provide synthesis of the data presented.

We hope that working with your almanac enables you to more easily integrate past experiences, assess present circumstances, and plan future intentions, so that you can contribute your unique gifts to the greater good. Thank you for your dedication to furthering the understanding of astrology, and best of luck in navigating these current chapters of your life journey!

A NOTE ABOUT ORBS USED

- **Chart wheels (natal, solar return, etc.):** Lines are drawn for aspects within 8° orb (except quincunx, drawn within 3°). Solid lines indicate aspects between planets. Transparent lines indicate aspects with angles, nodes, or asteroids. Dotted lines indicate quincunx.
- **Transit timelines:** Lines drawn within 2° when applying and 1° when separating.
- **Monthly/weekly calendars:** All aspects are listed at the moment of exactitude.

ALMANAC ANATOMY

MONTHLY CALENDAR

In the calendar pages that follow, you will find the exact dates and times of mundane and natal transits in your chosen location's time zone. The aspects included are conjunctions, sextiles, squares, trines, and oppositions. The one exception is transits from the Moon to your natal planets. For these aspects, we have chosen to show conjunctions only, in order to save space and limit the focus of the data presented.

Transit events in the almanac are color-coded to indicate their type. Mundane lunar transits are displayed in gray, all other mundane transits are **black**, and transits to natal placements are **blue**. In the Hellenistic plugin, transits to and from the annual profected timelord are highlighted in yellow.

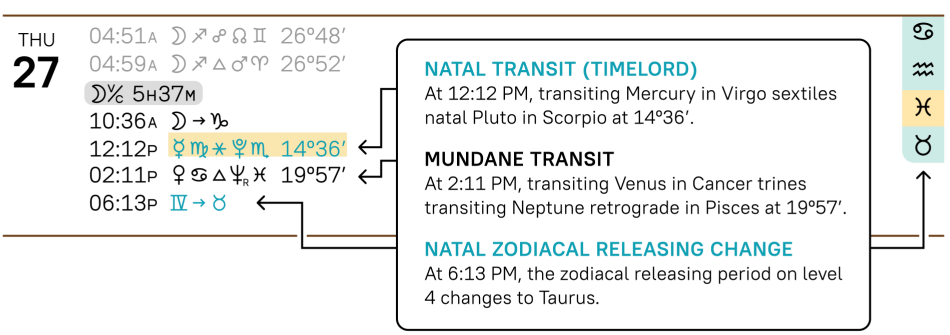

*For further details on zodiacal releasing notation, please see the Zodical Releasing Overview section.

**Hellenistic void moon conditions are relatively rare, and there may not be an instance of this in your current almanac date range.

WEEKLY CALENDAR

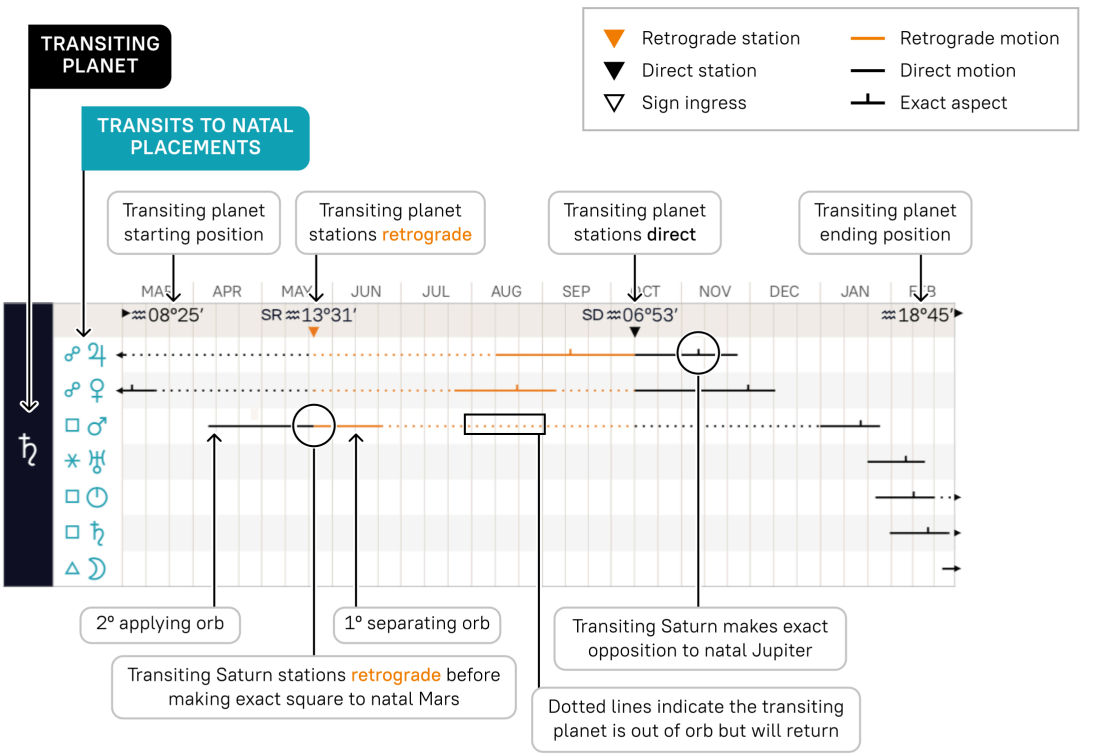

In the weekly planner pages, you'll find the same type of transit data as the monthly calendars, with the addition of signs and exact degrees for the planets in aspect.

ALMANAC ANATOMY

TRANSIT TIMELINE

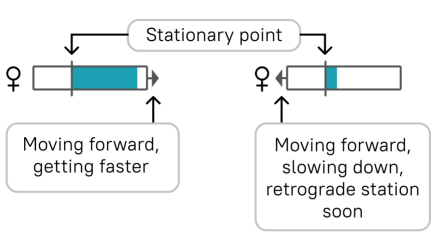

In the transit timelines, you'll find a visual overview of the planets currently aspecting your natal placements. The transiting planets are listed in order of slowest- to fastest-moving, from top to bottom of the page. In the 24-month overview of outer planet transits, the date range begins 3 months prior to your almanac start date, to give context for recent experiences. Note that the lines for direct motion are displayed in **black**, while retrograde motion is shown in orange.

These diagrams indicate the planet's apparent geocentric speed relative to its own possible range of motion.

PLANETARY SPEED

Secondary progressions move the natal planets one day for each year of life. For example, at age 37, the progressed chart displays the positions of each planet 37 days after birth. In the table to the right, data is displayed if a progressed change occurs in the next 100 years.

ANNUAL PROFECTIONS

Annual profections is a Hellenistic timelord technique that can help you determine which planetary transits and natal house themes might have the most impact for you in a given year of your life.

Each year at the moment of your solar return, a new sign and its ruler become your annual profected timelord. At your birth, or age 0, your rising sign/first house is profected, and the ruler of that sign is the annual profected timelord. At age 1, the next sign/second house is profected, and the ruler of this sign becomes the timelord for the year. This sequence continues around the chart wheel, profecting to each sign in order and returning to the rising sign/first house in multiples of 12.

Transits to and from the current annual profected timelord are highlighted in yellow in your calendar. After your solar return, the next profected timelord is highlighted. You may also wish to note transits of any planets located within the profected sign in your natal chart, as these planets can also play a larger role in your year.

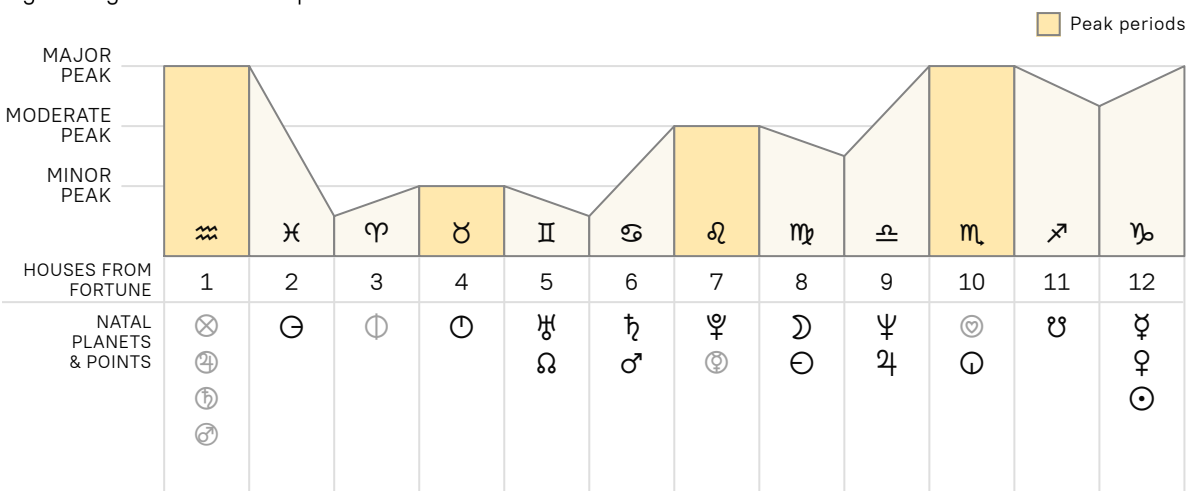

(Note that annual profections are typically referenced with whole sign houses, and if one is not using this house system for natal charts, it is advised to emphasize the profected sign and its ruler more so than the house, being sure to profect a new sign each year.)

ZODIACAL RELEASING OVERVIEW

NATAL FORTUNE ANGLES

The chart below indicates peak periods of activity in releasing from your chosen lot, based on each sign's angular relationship to the Lot of Fortune.

LENGTH OF GENERAL PERIODS

The length of a period is determined by the planetary ruler of the sign. The table below indicates the length for each of the twelve signs, as well as their angular relationship to other signs of the same modality. These relationships can indicate important chapters in the storyline of each releasing period.

ZR CALENDAR LIST

Throughout the almanac calendars, you'll see a vertical list of your current zodiacal releasing periods whenever a change occurs. The periods are displayed from top to bottom in order from longest to shortest time duration, with Level 1 in the top position and Level 4 at the bottom.

On the date in the example below, there is a Level 3 period change to Libra at 12:40 PM. Whenever a higher level changes, the subperiods beneath it automatically start a new cycle from the same sign, as you can see with Level 4 in this instance also becoming Libra.

The varying colors and borders for the ZR list indicate whether the current sign is a peak period, a non-peak period, a loosing of the bond period, or a post-loosing of the bond period.

PEAK PERIOD

Significant events/decisions relative to the chosen releasing lot

- ♏ ← PEAK
- ♏ ← PEAK LOOSING OF THE BOND
- ♏ ← PEAK POST-LOOSING OF THE BOND

NON-PEAK PERIOD

Preparatory or follow-through events/decisions relative to the lot

- ♋ ← NON-PEAK
- ♋ ← LOOSING OF THE BOND
- ♋ ← POST-LOOSING OF THE BOND

NOTES

ZODIACAL RELEASING VISUALIZATION

On the following page you'll find a visual overview of your current position in time through Levels 1, 2, and 3 of the zodiacal releasing periods from your selected Hermetic Lot. The diagram for Level 1 shows a "lifetime" view of 120 years, with the current Level 1 period highlighted in yellow. Beneath that, the Level 2 diagram shows your position centered within the current decade. For Level 3, an approximately 12-month range is shown, with the highlighted periods indicating the span of your current almanac calendars. (For Level 4 periods, please refer to the notation within your almanac's monthly and weekly calendars.)

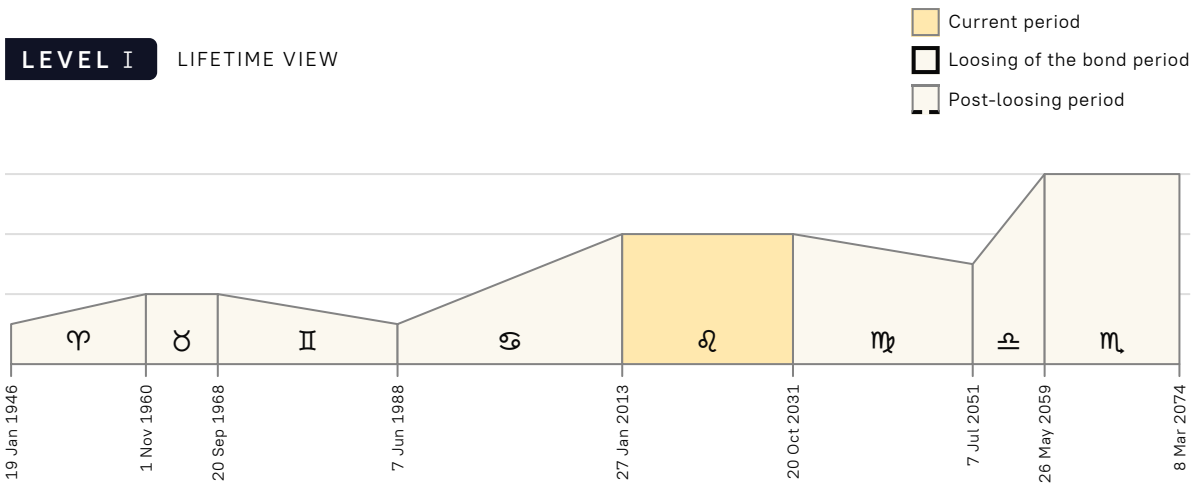

In these diagrams, a chart segment moving upward to the right indicates a preparatory period. A plateau segment indicates a peak period, and its height shows whether it is a major, moderate, or minor peak. A segment moving downward to the right indicates a follow-through period.

Additional zodiacal releasing diagrams for the remaining Hermetic Lots can be found in the back of your almanac.
